Exercise №3

Total slab thickness = =200mm
Steel deck depth = 76mm
Concrete slab dims = 40m x 55m

Total concrete -?
Slab Finish Area -?

concrete = Vol =

$= L \times w \times h = 55\,m \times 40\,m \times 0.162\,m = \boxed{356.4\,m^3}$

$Area = L \times w = 55\,m \times 40\,m = \boxed{2200\,m^2}$

Answer:

Total concrete = $356.4\,m^3$

Slab Finish Area = $2200\,m^2$
